

Sustainable products

For us, it is a top priority to use 100 % biodegradable, eco friendly and petroleum free car valeting products, which are to be effective and will not harm the Environment.

We work together with our suppliers to ensure that we are offering the best possible products, minimizing the carbon footprint and the waste of natural resources involved in production.

It is a great challenge for all of us to achieve this and we know that there is still long way to go, but we believe that the commitment and devotion of both Eco Drift team and our partners will bring greater results.
