

### Sustainable package

Equal in importance with the above marks is the packaging of our products. In Eco Drift, we are trying to pack our products in the most eco-friendly manner.

Our bottles are made from 100% recycled material, which is aimed to minimize the use of new resources. We are working closely with local suppliers and recycling facilities, so we could close the loop – package made of renewable material, which is widely recycled and has minimum carbon footprint.

It is very important to us, that we all recycle as much as possible. Besides the fact that we rely on recycling for our bottles and labels, if we all recycle more, we will shrink the UK carbon footprint.

[Here](#) you could find the recycling points in Hampshire.
